As expected and planned for, Fastned reports a loss of EUR 5.258 million over the first half year 2019, or EUR 4.432 million over the first half year excluding a one-off cost of EUR 826 thousand as a result of the Euronext listing. The loss of EUR 4.432 million excluding the abovementioned incidental cost compares to a loss of EUR 2.686 million (+65%) for H1 2018. (The loss before tax of Eur 5.258 million (+96%) compared to Eur 2.686 million in H1 2018 including abovementioned incidental costs). At the same time, revenues grew 230%. Comparing the two figures clearly shows the exponential nature of our revenue growth and the much more linear development of our costs.

There has been no significant change in the financial performance or financial position of Fastned since 30 June 2019.

The (un)audited (interim) financial statements of Fastned of the first six months ended 30 June 2019 and 30 June 2018 and the year ended 31 December 2016 and the year ended 31 December 2017 and the year ended 31 December 2018 are prepared in accordance with IFRS accounting standards.

Fastned adopted IFRS 16 'Leases', which replaced IAS 17 'Leases' and IFRIC 4 'Determining whether an arrangement contains a lease', with effect from 1 January 2019. Fastned elected to apply the modified retrospective transition approach in which the cumulative effect of initial application is recognised in opening retained earnings at the date of initial application with no restatement of comparative periods' financial information.

### 2.3 What are the key risks that are specific to the Issuer?

Any decision to invest in the Bonds should be based on consideration of this Prospectus as a whole by the investor. In purchasing Bonds, investors assume the risk that the Issuer may become insolvent or otherwise be unable to make all payments due in respect of the Bonds.

There is a wide range of factors which individually or together could result in the Issuer becoming unable to make all payments due. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer may not be aware of all relevant factors and certain factors which it currently deems not to be material may become material as a result of the occurrence of events outside the Issuer's control. The Issuer has identified the following factors which could materially adversely affect its business, results of operations and prospects, thereby potentially negatively impacting the ability to make payments due.

Risks related to Fastned's industry:

- Fastned's growth depends on the growth of the number of full electric Vehicles (FEVs) on the road. A slower than anticipated increase, or even a decrease, in the growth of FEVs may therefore slow down Fastned's growth and have a material adverse effect on Fastned's business, results of operations and prospects.
- Alternative charging behaviour may lead to less customers and therewith could have a material adverse effect on Fastned's business, results of operations and prospects.
- Fastned operates in a market that could become increasingly competitive. This could result in lower margins or in a loss of market share and may thus have a material adverse effect on Fastned's business, results of operations and prospects.
- Fastned's growth may not be sustainable, as the demand for fast charging stations depends on the continuation of certain trends and stagnation of these trends may have a material adverse effect on Fastned's business, results of operations and prospects.
- Constantly evolving technology could render Fastned's business less competitive and may have an impact on the competitiveness of the Fastned network and may thus have a material adverse effect on Fastned's business, results of operations and prospects.

Risks related to Fastned's business:

- Fastned may be unable to successfully execute its growth strategy in existing markets and expanding into additional markets such as Belgium, Switzerland and France which could have a material adverse effect on Fastned's business, results of operations and prospects.
- Disruption of back and front office software systems may lead to errors in the payment of the delivered electricity and has a negative influence on the turnover which could have a material adverse effect on Fastned's results of operations, financial condition and prospects.
- Fastned may not be able to hire and/or retain management, key employees and other qualified and skilled employees.

Risks related to the regulatory and legal environment in which Fastned operates:

- Pending legal procedures may have an impact on the Fastned business case, take up management time, and result in internal management and legal counsel costs.
- Risk of revocation, expiry and unsuccessful retender of operating permits may have an adverse effect on the location portfolio of Fastned which could have an adverse effect on its business, results of operations and prospects.

Risks Relating to the Financial Environment in which Fastned Operates:

- Fastned has recorded losses in recent periods and may not achieve profitability in the future, this could have a material adverse effect on Fastned's financial condition.
- Fastned may not be able to secure additional financing in the future to implement its growth strategy. Not being able to implement its growth strategy could have a material adverse effect on the business, results of operations, financial condition and prospects of Fastned.
- Failure to comply with the interest terms as mentioned in the Final Terms of the bonds issued by Fastned could result in an event of default. Any failure to repay or refinance the outstanding bonds when due could materially and adversely affect the business, results of operations, financial condition and prospects of Fastned.
- Fastned's inability to obtain subsidies for building its fast charging stations and/or receive payments under such subsidies could have a material adverse effect on Fastned's financial condition.

- Fastned has limited flexibility to adjust the operating costs of the business which could have a material adverse effect on Fastned's financial condition and prospects.

### Restrictions on Free transferability of the Bonds

There are no restrictions under the articles of association of the Foundation or Fastned or Dutch law that will limit the right of holders of the Bonds to hold the Bonds. The transfer of the Bonds to persons who are located or resident in, citizens of, or have a registered address in jurisdictions other than the Netherlands may, however, be subject to specific regulations or restrictions according to their securities laws.

### **3.2 Where will the securities be traded?**

The Bonds will have a limited tradability. At the relevant Issue Date, the Bonds will not be listed or admitted to trading on any regulated exchange or on any other exchange. Investors can sell and purchase the Bonds without involvement of the Issuer. The Issuer will provide a contract template for such a transfer at request. The transfer of the Bonds will only take place after the Issuer has received the transfer contract signed by both the purchaser and seller, and after the purchaser has paid a fee of EUR 100.- for each transaction to the Issuer.

### **3.3 What are the risks that are specific to the securities?**

The following is a summary of selected key risks that relate to the Bonds:

- Fastned may not generate sufficient revenues and/or be able to generate subsequent investments (refinancing) to be able to repay the principal amount of the Bond(s) at maturity. In such event, the principal amount may not be (completely) repaid at maturity. This could result in a delay of repayment or in the worst case, the principal not being (fully) repaid at all.
- Fastned may not generate sufficient revenues and/or be able to generate subsequent investments (refinancing) to be able to (completely) make interest payments as they become due. This could result in a delay of interest payments or in worst case, the interest not being (fully) paid out.
- The Bonds have a limited tradability. The risk to investors is that they may not be able to sell Bonds in their possession at a moment they wish to do so, possibly not at any price. As a result, it is possible that investors have to wait until the moment of redemption to redeem the principal amount related to their investment in the Bonds.

## **4 KEY INFORMATION ON THE OFFER OF BONDS**

### **4.1 Under which conditions and during what period can I invest in the Bonds?**

#### Offering Period and Subscription

Subscription to the offer is only possible during the subscription period (the **Subscription Period**). The Subscription Period closes earlier when fully subscribed. The subscription process takes place through the website [www.fastnedcharging.com/bonds](http://www.fastnedcharging.com/bonds). The issuance of the Bonds is conditional upon the corresponding payment being made by the investor as part of the subscription. The Issuer has the right to refuse a subscription without disclosure of any reason. The Issuer can extend, shorten or suspend the Subscription Period during or prior to the Subscription Period. The board of Fastned can decide at any time during the Subscription Period to increase the number of Bonds of a particular Issue up to the maximum amount of this Prospectus and/or extend the Subscription Period with a maximum of up to two additional weeks. In such a case the Issue Date and the Maturity Date will be extended with the same number of days.
